

# FLASHERS (E.L.)

ELECTROLUMINESCENCE (E.L. PLATE)

EL products can range in size and shape. They can be as thin as a few sheets of paper or be integrated into a backing and mounting piece (which we recommend). Each EL sheet is 'controlled' by a controller, which varies in size depending on the number of sequences. The controller is attached to a UL approved adaptor.

EL costs range based on size of piece, complexity, amount of lighting pattern, and integration of controller and adaptor into the backing piece.

We are experts in production and assembly of EL products. Do not be fooled by lower priced models - oftentimes a white light up isn't white or the piece will fade over time. We can help you develop exactly the piece you want at the price you want.

If you are looking for help in design, production of shipping, simply call us and we can help.

#### PRODUCT SPECIFICATIONS

Available in any size or shape from 1" x 1" to 3' x 3'

#### SEQUENCING OPTIONS

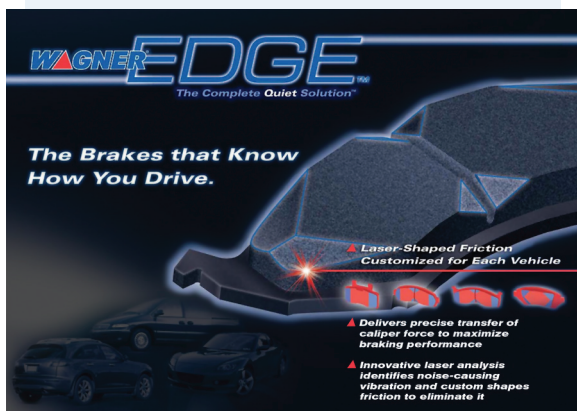

Custom to your needs - three "light up" sections use a smaller controller.

#### AVAILABLE OPTIONS

Specially molded backs, custom power supplies (batteries, auto or AC), special packaging.

#### MINIMUM QUANTITIES

Typically 2,000 units for smaller size items (under 8" x 8"). Artwork should stay the same.

WAGNER EDGE BRAKES

We've adapted an old technology to create vibrant new promotions. With **FLASHERS** displays, we can create picture perfect images that light up. We can then make the images sequence in any desired light up pattern. It is **E.L.** technology that lights up automobile dashboards, airplane cockpits and some watches.
